GRAFFITI SHIELD™: Breathable. Waterborne. Low VOC's

NEW HY-POWER COATINGS GRAFFITI SHIELD™ SOLVES GRAFFITI PROBLEMS --- PERMANENTLY!

Hy-Power has developed a more effective solution to the frustrating and expensive graffiti problem facing property owners. Hy-Power's Graffiti Shield™ works to protect a wide range of exterior and interior porous and non-porous surfaces - e.g. wood, brick, stucco, concrete and metal; to improve structural integrity and protect against future tagging.

After application, vandals' subsequent attempts at "re-tagging" are deterred by Hy-Power's invisible protective shield. Coated surfaces will not allow various unwanted spray paints, lacquers and enamels to permanently adhere.

BREATHABLE. WATERBORNE. LOW VOCs.

These product attributes make Hy-Power's **Graffiti Shield™** unique and effective. Its **breathability** feature allows moisture to escape porous surfaces to avoid cracking or peeling; preserving aesthetic appeal while protecting surfaces from UV degradation, corrosion, abrasion and future chemical attacks.

Waterborne and low VOC properties make Graffiti Shield™ safer and better for the environment than solvent based products.

CONVENIENCE and SERVICE

Professionally trained Hy-Power crews can:

1. Remove unsightly graffiti
2. Repaint and/or colour match the treated surface with Graffiti Shield™ as specified by the property owner
3. Quickly remove any re-tagging and maintain the ongoing aesthetic appeal of surfaces.
4. Ship transparent and environmental friendly Graffiti Shield™ to customer for DIY coating
